

## Press - release

December 06, 2021

### New cars sales decrease is 20,4% in November 2021

In **November 2021**, sales of new cars and light commercial vehicles in Russia **decreased by 20,4%** compared to **November 2020** or by **32 114** sold units, and amounted to **125 466** cars according to the AEB Automobile Manufacturers Committee (AEB AMC).

**Dr. Thomas Staertzel**, Chairman of the **AEB Automobile Manufacturers Committee** commented:

"In November, 125 466 cars were sold, 20,4% less than a year ago. Still the YoY result Jan-Nov 2021 is positive with 1 439 045 new cars sold, which is 6,9% higher than during the same period of 2020. Usually, December is a good month for car sales, but this year is different and it also seems that this trend will continue during the next year with even worse figures in the coming months.

On top of all negative market factors, such as production decrease, deficit of semiconductors and logistics problems, the Government initiates legal acts, which might make the situation even worse – the published draft Order of the Government envisages almost 9 times increase of the disposal fee for e-vehicles. Together with the announced non-extension of the zero import duty on e-vehicles, this measure will substantially undermine the development of this market segment, which has just started to grow in Russia. Unfortunately, this measure has not been discussed with the industry. We believe that the adoption of this Order will increase prices of e-vehicles for end-customers and slow down their sales dynamic as well as the development of the charging infrastructure.

The final Year 2021 results will be announced at our Annual press-conference on 13 January 2022, where we will try to give an industry outlook for the next year."

#### **Note:**

Monthly AEB data does not include sales figures from BMW and Mercedes-Benz Rus, following BMW Group and Mercedes-Benz AG decisions to change the frequency of their sales data publication from a monthly to a quarterly basis.
